Please Welcome

DAVID BCHIRI

President of XRPL Commons

Commons

Our mission is to create
the **conditions of success** for
builders, **entrepreneurs** and
developers to thrive in the **XRPL**
ecosystem.

Learn

The learning curve for Blockchain is steep. It's better to be supported whether you have tech or business roles.

Build

Our in-house residency and hackathons offer builders a playground for invention.

Launch

Accelerate your project at the Aquarium Residency, where developers and entrepreneurs transform ideas into reality.

Adopt

Blockchain integration for corporations and large institutions with tailored support and resources.

Engage

Meetups, Townhalls, Community Magazine and news on our socials unite the XRPL ecosystem.

What success looks like?

● Learning and Aha moments

● Network

● Products

● Startups

● Investors

● Co-Founders

● Career

● Money

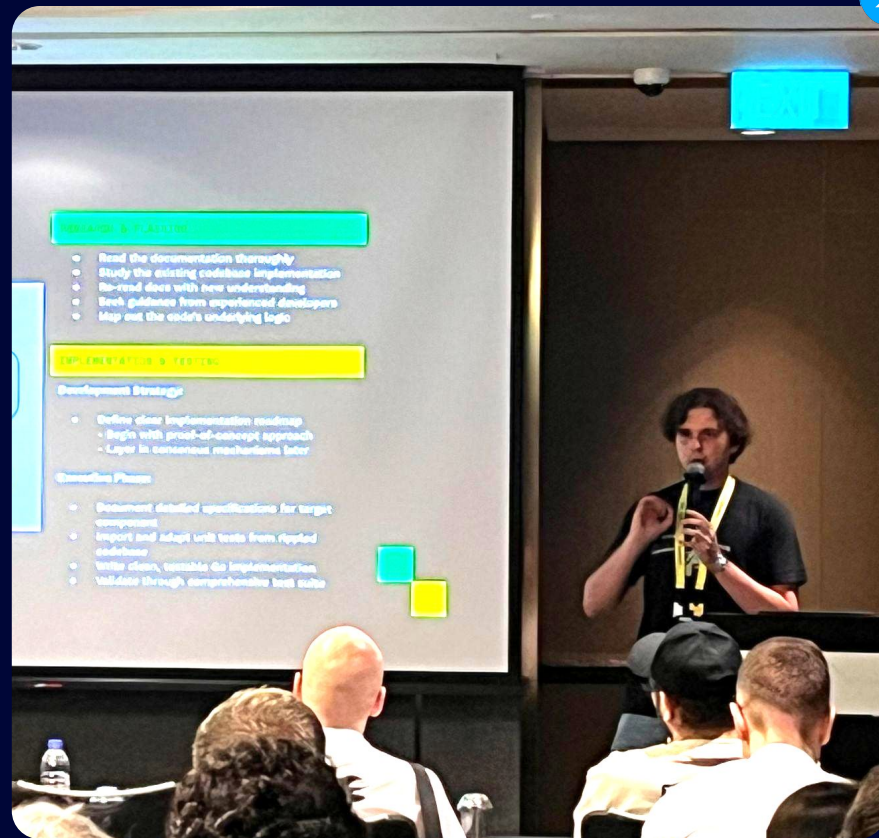

It's a journey

Topic: Bitcoin without mining (Read 13555 times)

 **Bitcoin without mining**
May 27, 2011, 03:44:53 PM

#1

So I've been thinking...

mining seems like such an unfortunate side effect of the system since it is so wasteful. It will be a bit obscene how much will be spent mining if the network ever gets large. It would be cool to come up with a bitcoin that doesn't need miners.

There are several issues but I'll ignore how coins are distributed and focus on the central problem of creating some way to trust the central ledger*. Currently this is what mining solves. The network trusts the ledger with the most mining done on it. So now to trust bitcoin you have to trust that >50% of the current mining power is "good". And actually the way the network has evolved with pools we are actually trusting that every large pool operator is "good" since even if the pool isn't over 50% the operator could have non-pool mining going on bringing the total over 50% or two pools could collude to defraud the network etc. Also if say some government decides to wreck the network it wouldn't be that expensive for them to do so. (This is all discussed in other threads so no need to go into this here) My point is that although the current network uses mining as a way to solve the trust issue it really doesn't since you still must trust the large pool operators.

My idea is to make this issue of trust explicit.

Let's say a **node** has a public key that the client generates for them. There is no connection between this key and a wallet key. It just allows you to be sure you are talking to the node you think you are.

So when you run a node you choose which other nodes you trust. So you could say "I trust my 3 friends' nodes, Gavin's node, and these 5 businesses' nodes." This trust just means that you believe these people will never participate in a double spend attack or otherwise manipulate the ledger. The ledger would basically be like the current bitcoin block chain but it would also have a list of what nodes believe the current ledger to be valid. <hash of current ledger signed by node's public key> (This list doesn't have to be complete. Nodes can just collect this list as needed. They could even just ask the nodes they trust if they think the current ledger is valid since those are the only ones they care about)

Transactions are still sent to all nodes connected to the network. There would be a network wide timestamp. Transactions would only be accepted if they were within a certain time period of the network timestamp. So you would need to wait maybe 10min before you could fully trust a given transaction. After this waiting period you could be sure those coins weren't double spent.

ABOUT LA FAÏENCERIE

- This used to be a factory, keep the spirit
- Be respectful of this 137 year-old venue.
- The event takes place exclusively in the **Auditorium** and the **Mezzanine**, please do not leave the designated areas.
- The venue is open all night.
- You can stay and work/sleep here, but **exit is final after 10:30 PM.**
- New entries will be allowed on **Sunday from 8:00 AM.**

AGENDA

Saturday 11th

AM

08:30 – 09:00

Doors open & breakfast

09:30

Welcome speeches

10:00 – 11:00

Team leads revolving pitch

10:00

Let's Hack!
(Official start)

11:00 – 12:00

Dive into the XRP Ledger
Universe (Workshop)

PM

01:00 – 02:00

Lunch break

04:00 – 05:00

Hack the mentor (Office hours)

07:00 – 08:00

Dinner break

9:00 – 09:30

Wake-Up! (Hacker activity)

Sunday 12th

AM

08:30 – 09:00

Coffee & Breakfast

11:00 – 11:30

Hack the Mentor
(Office hours)

PM

01:00

Final project submission

01:00 – 02:00

Lunch break

02:00 – 03:00

First Round Team Pitches

03:30 – 04:30

Finalist Team Pitches

04:30 – 05:30

Jury deliberation

04:30 – 05:30

Winner Ceremony

06:00 – 07:00

Cocktail

08:00

Closing

Please Welcome

LUC BOCAHUT

Product Director of XRPL Commons

THEMES & PRIZES

MAIN THEME

MAKE WAVES

Build on XRPL to create apps that power real users, businesses, and value flows.

Focus on payments, real-world assets, or institutional DeFi, driving recurring transactions, sustainable value moved on chain (\$VMT), and measurable ecosystem growth.

MAIN PRIZES

FIRST PRIZE : 2,500€

SECOND PRIZE : 1,500€

THIRD PRIZE : 1,000€

PARTNERS BOUNTIES

Boundless **1,000€**

Build an XRPL application that offloads heavy computation to the Boundless prover network and verifies the results trustlessly on-chain.

Quicknode **1,000€**

Build an XRPL application that leverages the Quicknode on demand infrastructure and primitives in the most innovative way.

Please Welcome

EMILIANO BONASSI

VP of Engineering
at Boundless

 Boundless

Please Welcome

ROMAN TEREKH

Customer Success
Executive at QuickNode

IMPACT BOUNTIES

 **rippleimpact** **1,5K€ + 1K€**

Put blockchain at the service of social and environmental impact, fight climate change, democratize access to finance for the most excluded populations, and ensure that this technology benefits the common good above all.

SPECIAL BOUNTIES

ZERO TO USERS **1,000€**

Launch a live product on XRPL during the hackathon. The winner is whoever drives the most real on-chain users before time runs out. Just traction.

PIXEL MEETS CHAIN **1,000€**

Build the most visually stunning XRPL experience, 2D, 3D, generative, immersive, art, or something we haven't seen yet. Impress us before we even read the code.

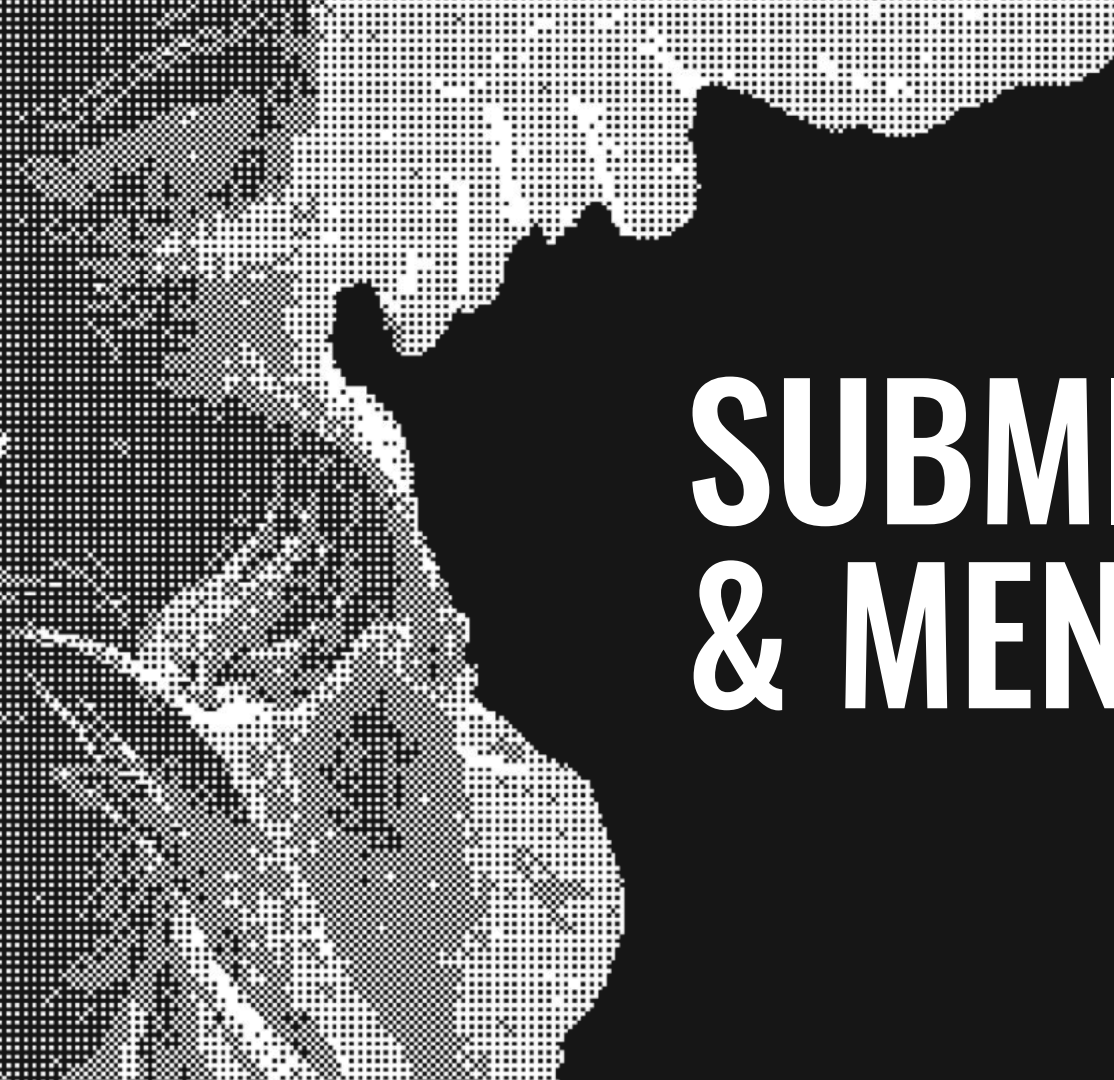

WHY NOT? **1,000€**

The most unexpected, bizarre, or delightfully absurd XRPL project wins. We don't know what we're looking for, and neither do you. Yet. Forget best practices, think outside the ledger.

PROJECT EVALUATION

- ➔ Idea
- ➔ Implementation
- ➔ Presentation / Demo
- ➔ Potential

All projects must be started during the hackathon, not before!

SUBMISSION & MENTORS

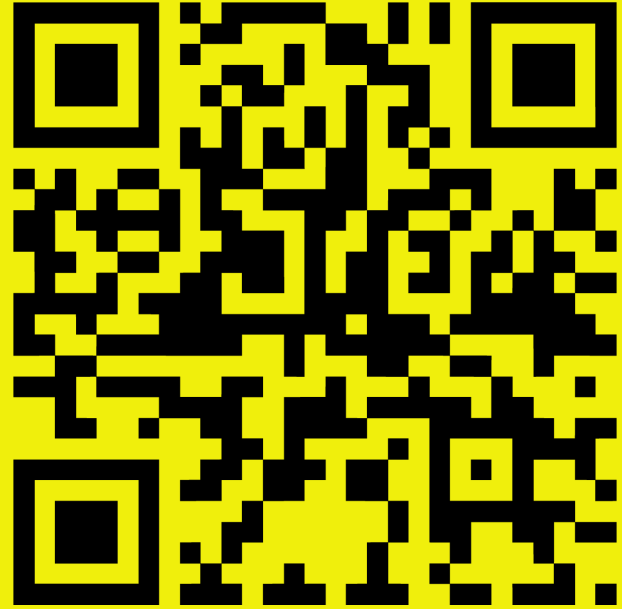

**SUBMISSIONS ARE DUE
TOMORROW AT 1PM**

USE THE HACKATHON APP TO :

- Register for the hackathon
- Join or create a team
- Submit your project

Having trouble?

Ask us for help or send us a message in the app!

PITCH IN TWO ROUNDS

02:00 to 03:00 PM

3-minutes pitch, 2-minute Q&A

03:30 to 04:30 PM

5-minute pitch on the main stage for the 10 finalists
